Would Scratch and Tear the Flesh Unless Hands Were Tied - Wasted to a Skeleton-Awful Suffering for Over a Year-Grew Worse Under Doctors-Skin Now Clear.

WOULD, HAVE DIED BUT FOR CUTICURA.

"My little son, when about a year and a half old, began to have sores come out on his face. I had a phy-

secan treat him, but the sores grew worse. Then they began to come on his arms, then on other parts of his body, and then one came on his chest, worse than the others. Then I call-ed another physi-

others. Then I called another physician. Still be grew worse. At the end of about a year and a half of suffering he grew so bad I had to the his hands in cloths at night to keep him from scratching the screen and tauring the flesh.

"He got to be a mere skeleton, and was hardly able to walk. My Aunt advised me to try Cuticura Soap and Ointment. So great was her faith in it that she gave me a small piece of Soap to try and a little of the Ointment. I took it home without any faith, but to please her I tried it, and it seemed to dry up the scress a little.

"I sent to the drug store and got a cake of the Soap and a box of the Ointment and followed the directions, and at the end of about two months the sores were all well. He has never had any sores of any kind since.

"He is now strong and healthy, and I can sincerely say that only for your most wonderful remedies my precious child would have died from those terrible sores. I used only one cake of Soap and about three boxes of Ointment. (simed) Mrs. Egbert Sheldon, R. F. D., No. I, Woodville, Conn. April 22, 1905."

U. S. EXPERIMENT.

The Season Unpropitious for Tobacco Tests,

bacco Tests,

[Special to The Times-Dispaten.]
CHATHAM, VA, September 12.—The
last of the tobacco of the United States
Experiment Station was cut on Tuesday and curing commenced last night.
Mr. Green, who is in charge of the station, does not expect the color to be
very good, as the crop as a whole in this
section is very much diseased and curing
hadly as a general thing, with many
specks and light in weight.

Considering all things, the experiment
has been very good, but will be continued
next year, and probably longer, as it
will require several years to test the
soil and determine the fertilizers best
suffed to grow a profitable crop of the
weed and leave the land in good condition.
